| Project roles and Responsibilities:   | The UBS AG Account Migration project was a complex undertaking that involved migrating records to a new system. The project was completed on time and within budget, and UBS was pleased with the results. The project team consisted of engineers and consultants from Wipro, who were responsible for all aspects of the migration, including data migration, security, and reporting. The project was a success for both Wipro and UBS, as it resulted in improved operational efficiency and security for UBS, and easier access to accounts and tracking of transactions for UBS customers. |           |             |
