Work Experience

May 2022 - Present
Bangalore, India

Software Engineer
Wipro Technologies

- Developed project plans and guidelines that provided a roadmap for successful completion of the project and its evaluation
- Worked in technologies of Core Java, Java8, Springboot and Microservices along with jenkins and Git for integration and deployment.
- Developed REST APIs and its other performance optimization metrics.
- Collaborated with cross-functional teams to ensure alignment of project goals and objectives.
- Worked on agile methodologies to ensure smooth delivery of tasks.

Projects & Hands-on

Online Movie Management

• Web application in which user can be able to see the movies and movie details, also clicking on the movie user can see the show details like in which theatre that movie being played, also there is a booking option which takes the user to the login page from where they can proceed to payment gateway.
• The Admin has full access to the whole system like, He/She can login to the admin dashboard and perform CRUD operations in Movie details, Show details, Theatre details.
• The website contains authentication for both user and admin.
• A complete dynamic website developed using React JS and bootstrap with backend technology , Spring Boot. MySQL is used for database
